

Kilimo bora cha ndizi

Palizi

Kwa nini ufanye palizi?

Palizi hupunguza kushindania virutubisho na raslimali zingine kati ya magugu na migomba.

Palizi

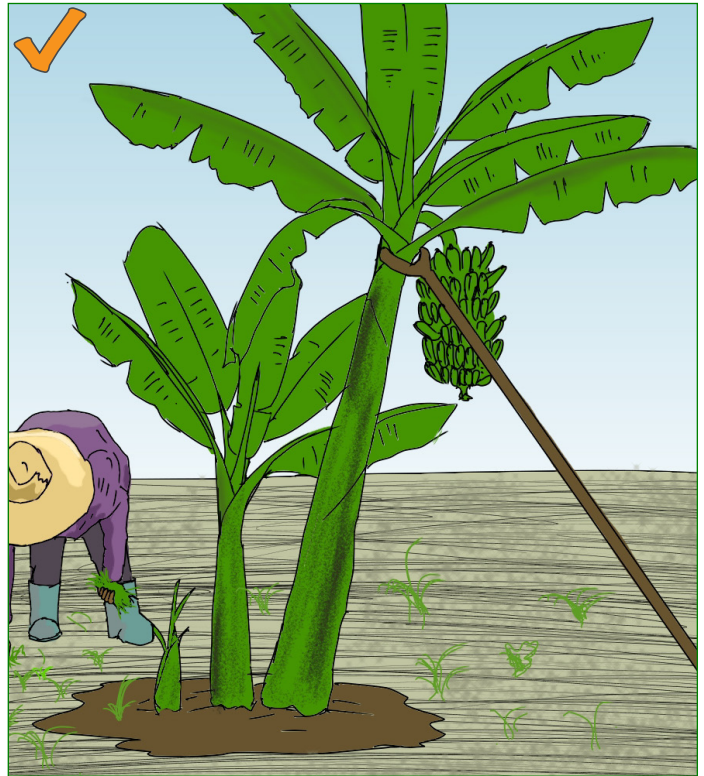

Jinsi ya kupalilia

Ikiwa utatumia jembe bapa kupalilia, epuka kutifua udongo ndani zaidi ili usikate mizizi ya migomba

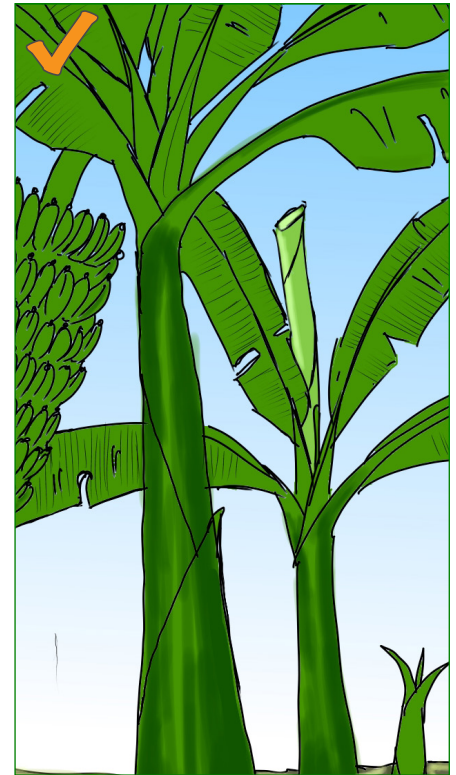

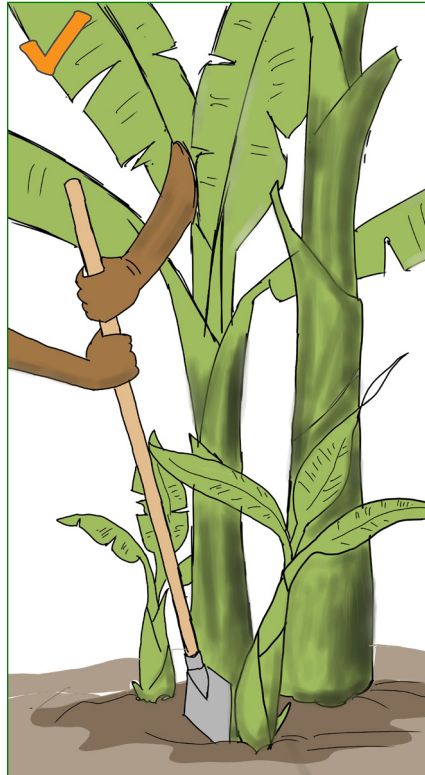

Palizi

Wakati mzuri wa kufanya palizi

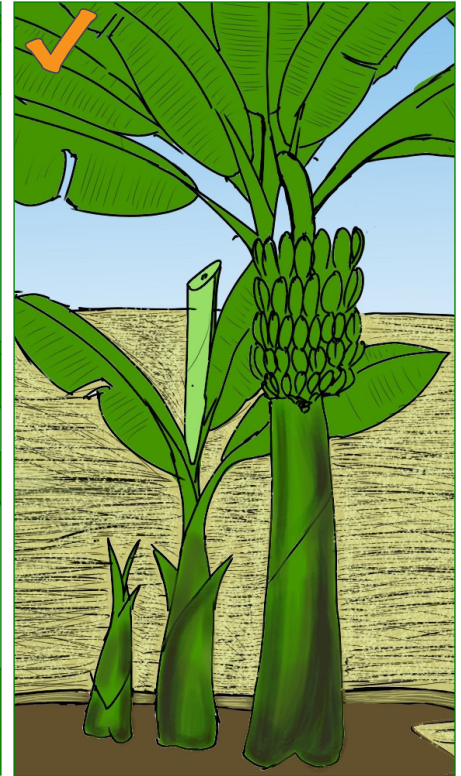

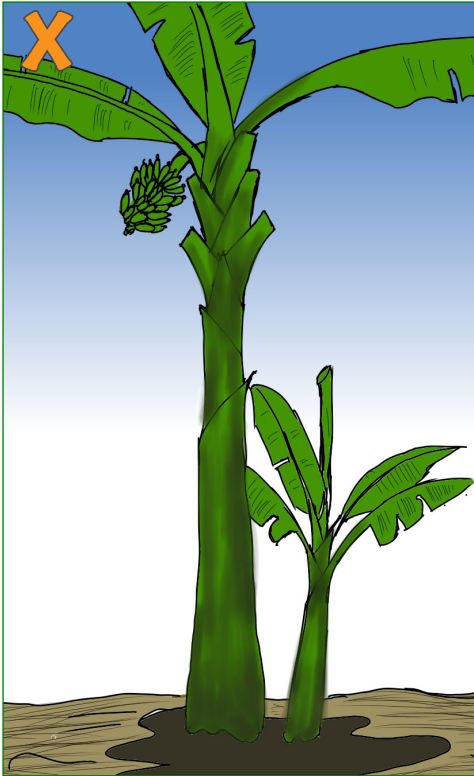

Kuhudumia shina la mgomba

Kupunguza miche ya ziada

Kuhudumia shina la mgomba

Kupogoa majani makavu

Kuhudumia shina la mgomba

Kuondoa matunguu

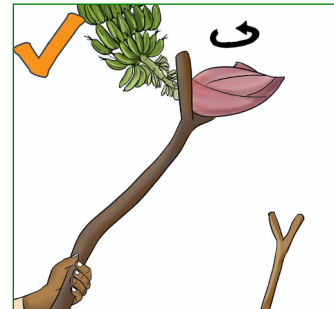

Kuhudumia shina la mgomba

Kuondoa matunguu

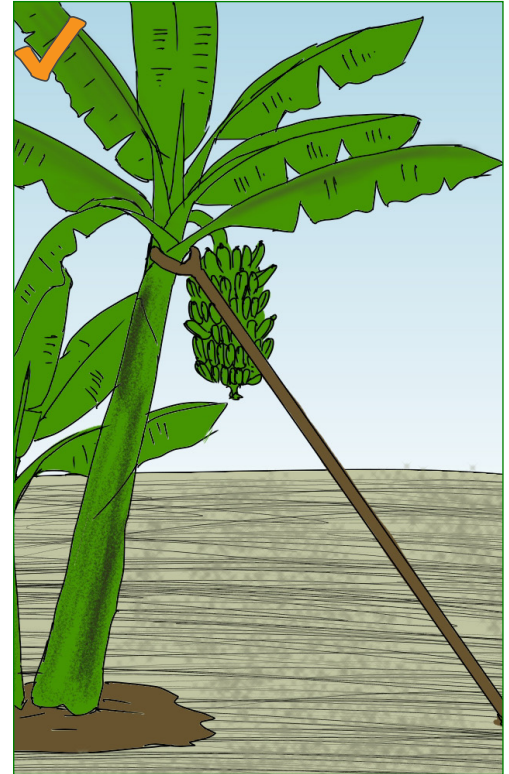

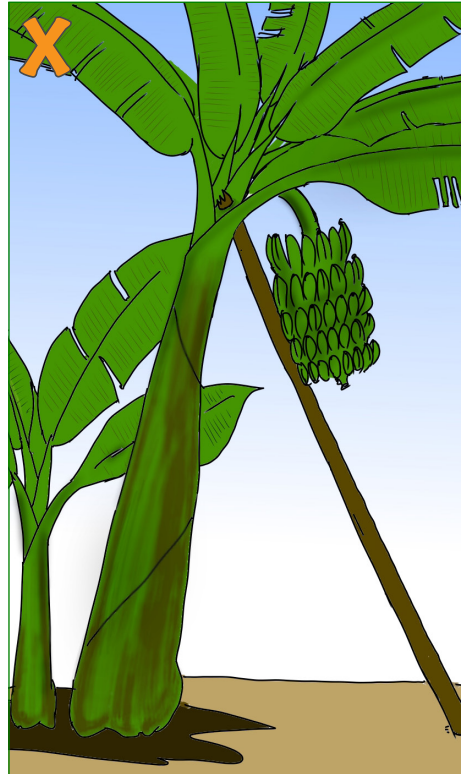

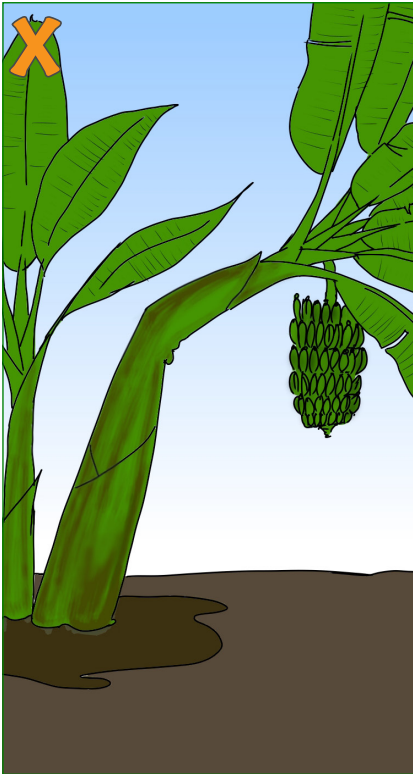

Kuhudumia shina la mgomba

Kuondoa ua dume

Kuhudumia shina la mgomba

Kuweka miega

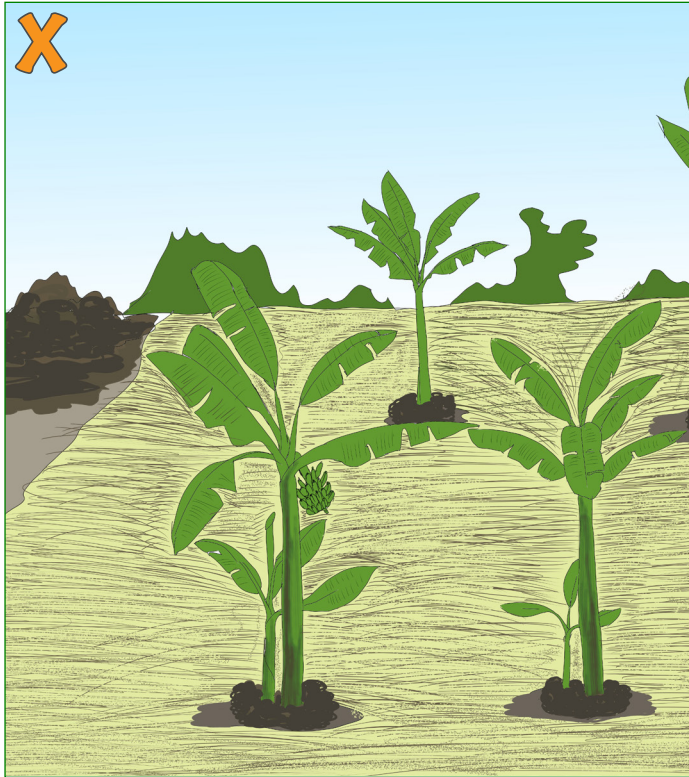

Kuchimba mitaro shambani

Kuzuia upotevu wa maji ya mvua kwa kutumia makinga maji

Kuweka samadi

Uwekaji mzuri wa samadi

Kuweka matandazo

Uwekaji sahihi wa matandazo

Picha: Elisha Rutha

Shamba lisilo na matandazo likionesha udongo ambao haujafunikwa

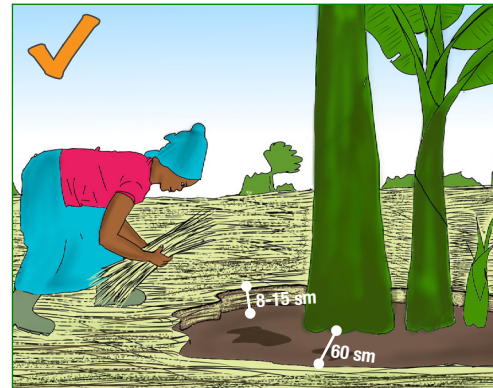

Picha: Elisha Rutha

Matandazo kidogo yasiyokidhi unene wala kina cha matandazo kama inavyopendekezwa

Matandazo kugusa mashina ya migomba

Matandazo yamezingatia unene wa 8-15 sm mbali na mashina ya migomba

Kudhibiti visumbufu vya migomba

Kusafisha (zindika) miche kuzuia mdudu fukusi na minyoo wa ardhini

Mche ambao haujasafishwa

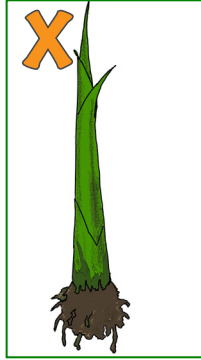

Mche uliosafishwa

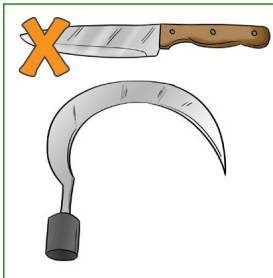

Kudhibiti ugonjwa wa unyanjano

Kudhibiti unyanjano kwa kuondoa ua dume na kutumia miche bora

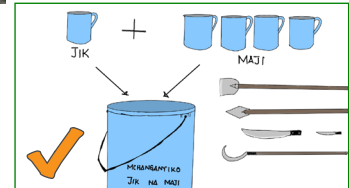

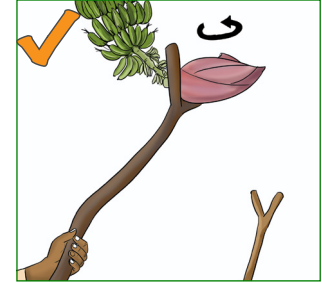

Usitumie miche iliyotoka kwenye shamba lenye ugonjwa

Usiondoe ua-dume na vifaa hivi

Tumia miche bora

Pitisha kifaa chako kwenye moto mkali kwa sekunde 30

Kudhibiti ugonjwa wa unyanjano

Kuondoa migomba baada ya kubainika kuwa na ugonjwa wa unyanjano

Uondoshaji wa migomba mmoja mmoja mara tu baada ya kubainika kuwa na ugonjwa wa unyanjano kwa kutumia mkuki maalum (kihosho/chimbuo). Wakati wa kuondoa migomba hiyo, uangalifu uwepo ili migomba jirani isidhurike. Migomba iliyong'olewa ikatwe-katwe vipande vidogo-vidogo na kuachwa shambani ikauke.
